

Michigan.

When God Created this old world with the part
called Michigan:

He smiled, and thought - He would surprise
the Human race again:

And so He formed the hills with strength, ~~and~~
made prettiest valleys ever seen,

And grew upon them mighty Oaks, White
Birch, and lovely Evergreens.

With Lakes that shimmer in the Sun where
fishing is so neat;

And rivers winding in and out and meadows
flowers sweet.

And then to make it more complete, placed
Ozone in the air for food,

To build frail bodies, steady nerves, and
then, pronounced it good.

Am not going to dwell on minerals. Industries, etc.
